SIDHARTHA THARALA

B.Tech CSE Student | Data Science & Generative AI

8297132809 | sidharthatharala28@gmaill.com | Hyderabad, Telangana
github.com/sidharthatharala98 | linkedin.com/in/sidhartha-tharala-66b27a387

PROFILE

Computer Science and Engineering student with hands-on experience across web application development, product design, and startup-style prototypes. Interested in applying Python, data analysis, and Generative AI to practical problems; keen to build reliable, useful tools through experimentation, automation, and iterative development.

EDUCATION

B.Tech, Computer Science and Engineering | Vaagdevi College of Engineering
2025–Present

TECHNICAL SKILLS

Programming & Web: Python, JavaScript, Node.js, Express, HTML, CSS
Data & AI focus: Data analysis, machine-learning fundamentals, Generative AI, LLM applications
Tools: Git, GitHub, React, Swiss Ephemeris
Design: UI/UX design, interface prototyping

SELECTED PROJECTS

Vedic Panchang — Built a web application using Node.js, Express, and Swiss Ephemeris to work with Panchanga elements including Tithi, Nakshatra, Yoga, Karana, and Vara.

OmniSight — Developed a retail-intelligence concept exploring footfall, dwell time, queue monitoring, and heatmap insights for small shops, with an edge-processing focus.

QuickRush / TapKart — Designed a scan-and-go retail checkout concept covering product scanning, digital cart, payment flow, billing, and exit verification.

Stackweb — Worked on a neo-brutalist web concept, focusing on visual hierarchy and a distinctive interface system.

EXPERIENCE

UI/UX Design Work | Dhiora Groups
Contributed to interface design for ManaHRMS and the Dhiora app, with a focus on layouts and product usability.

GENERATIVE AI & AUTOMATION

Currently targeting practical work with LLM-powered applications and workflow automation. Interested in using AI tools to streamline repetitive tasks, connect APIs, and prototype useful assistant workflows.
